3. Where to Find Prospects
4. Qualification Criteria
5. Country-Specific Research

Ideal Customer Profile (ICP)

Primary Target: Affaires Scientifiques et Médicales

SciSense's ideal customers are professionals working in **Medical Affairs**, **Scientific Affairs**, or **Regulatory Affairs** within:

Company Type	Why They Need SciSense
Pharmaceutical laboratories	Deep study analysis, scientific communication, medical strategy
Biotechnology companies	Evidence generation, publication support, regulatory dossiers
Vaccine manufacturers	Clinical data interpretation, safety communication, KOL engagement
Medical device companies	Scientific positioning, regulatory documentation
CROs with medical affairs services	Overflow capacity, specialized expertise
Healthcare institutions	Research support, scientific communication

Company Size Sweet Spot

- **Mid-size pharma/biotech** (500-5,000 employees): Often need external support but can’t justify large in-house teams
- **Growing specialty pharma** (100-500 employees): Building medical affairs capabilities
- **Large pharma regional affiliates**: Country-level medical affairs with budget autonomy

---

Prospect Personas

Persona 1: The Medical Affairs Head (Decision Maker)

Titles:
- VP Medical Affairs
- Head of Medical Affairs
- Global Head of Medical Affairs
- Director, Medical Affairs
- Directeur des Affaires Médicales

Characteristics:
- Budget authority for external partnerships
- Oversees MSL teams, medical information, publications
- Reports to CMO or General Manager
- Typically 10-20+ years experience

Pain Points:
- Resource constraints during product launches
- Balancing global strategy with local execution
- Evidence generation timelines
- KOL engagement quality

Where to Find:
- LinkedIn: Search “Head Medical Affairs” + [company name]
- Company websites: Leadership/About Us pages
- Conference speaker lists (DIA, MAPS, AMCP)
- Press releases announcing appointments

Qualifying Questions:
- Do they have products in late-stage development or recent launches?
- Are they expanding into new therapeutic areas or geographies?
- Have they recently announced partnerships or acquisitions?

Persona 2: The Global Medical Product Lead

Titles:
- Global Medical Product Lead
- Medical Product Manager
- Global Medical Director, [Therapeutic Area]
- Medical Brand Lead

Characteristics:
- Owns medical strategy for specific product(s)
- Cross-functional coordination (R&D, Commercial, Regulatory)
- Evidence generation and publication planning
- Typically 8-15 years experience

Pain Points:
- Publication timelines and journal submissions
- Competitive intelligence and differentiation
- Launch readiness and medical education
- Real-world evidence generation

Where to Find:
- LinkedIn: Search “Global Medical Product Lead” + [therapeutic area]
- Congress author lists (check abstracts/posters)
- ClinicalTrials.gov (medical monitor contacts)
- Company press releases about product approvals

Qualifying Questions:
- Is their product facing competitive pressure?

- Are there recent clinical data readouts to communicate?
- Are they preparing for regulatory submissions or launches?

Persona 3: The MSL / MSL Lead

Titles:
- Medical Science Liaison (MSL)
- Senior MSL
- MSL Lead / MSL Manager
- Field Medical Director
- Responsable MSL

Characteristics:
- Field-based scientific engagement
- KOL relationship management
- Scientific education and communication
- Typically PhD, PharmD, or MD background

Pain Points:
- Keeping up with scientific literature
- Creating compelling scientific content
- Preparing for KOL meetings
- Congress preparation and follow-up

Where to Find:
- LinkedIn: Search “MSL” + [therapeutic area] + [country]
- Company career pages (MSL job postings indicate team size)
- Medical affairs conferences (MAPS, MSL Society)
- LinkedIn groups: MSL Society, Medical Affairs Professionals

Qualifying Questions:
- Are they in a growing therapeutic area?
- Do they cover multiple products (capacity constraints)?
- Is their company launching new products?

Persona 4: The Scientific/Medical Affairs Project Manager

Titles:
- Chef de projet affaires scientifiques et médicales
- Medical Affairs Project Manager
- Scientific Affairs Manager
- Chargé(e) de projets médicaux

Characteristics:
- Coordinates medical projects and timelines
- Works with external vendors and agencies
- Publication and congress planning
- Typically 5-10 years experience

Pain Points:
- Managing multiple concurrent projects
- Vendor coordination and quality control
- Timeline management
- Resource allocation

Where to Find:
- LinkedIn: Search “projet affaires médicales” or “Medical Affairs Project”
- Company LinkedIn pages (employees section)
- Job postings (indicate hiring needs)

Qualifying Questions:
- Do they have multiple products in development?
- Are they preparing for major congresses?
- Have they posted job openings (indicating capacity needs)?

Persona 5: The Medical Writer / Publications Manager

Titles:
- Medical Writer
- Publications Manager
- Scientific Writer
- Rédacteur médical

Characteristics:
- Creates scientific content (manuscripts, abstracts, regulatory docs)
- Manages publication planning
- Works with authors and journals
- Typically PhD or scientific background

Pain Points:
- High volume of writing requests
- Timeline pressures for submissions
- Quality and consistency across documents
- Regulatory writing vs. promotional writing balance

Where to Find:
- LinkedIn: Search “Medical Writer” + [company] or [therapeutic area]
- ISMPP (International Society for Medical Publication Professionals) membership

- Author lists on published papers
- AMWA (American Medical Writers Association) directory

Qualifying Questions:
- Does their company have a large publication portfolio?
- Are they preparing for major regulatory submissions?
- Have they published multiple papers recently (capacity indicator)?

Persona 6: The Regulatory Affairs Specialist

Titles:
- Regulatory Affairs Manager
- Chargé d’affaires réglementaires
- Regulatory Affairs Specialist
- Head of Regulatory Affairs

Characteristics:
- Manages regulatory submissions and compliance
- Interfaces with health authorities
- Scientific/clinical documentation
- Typically 5-15 years experience

Pain Points:
- Submission timelines and quality
- Scientific writing for regulatory dossiers
- Responding to agency questions
- Keeping up with regulatory changes

Where to Find:
- LinkedIn: Search “Regulatory Affairs” + [therapeutic area/country]
- RAPS (Regulatory Affairs Professionals Society) membership
- Company regulatory announcements
- Health authority meeting disclosures

Qualifying Questions:
- Do they have products in regulatory review?
- Are they expanding into new markets (new submissions)?
- Have they received Complete Response Letters or questions?

Where to Find Prospects

1. LinkedIn (Primary Source)

Search Strategies:

```
Basic Search:
"Medical Affairs" + [therapeutic area] + [country]
"Affaires Médicales" + [company type] + France/Belgium
"MSL" + [disease area] + [location]

Advanced Search Filters:
- Current company: [target company names]
- Location: France, Belgium, UK, Switzerland
- Industry: Pharmaceuticals, Biotechnology
- Title: contains "Medical", "Scientific", "MSL", "Regulatory"

Boolean Search Examples:
(Medical Affairs OR Affaires Médicales) AND (Head OR Director OR VP) AND (vaccine OR oncology)
MSL AND (immunology OR oncology) AND (France OR Belgium)
```

LinkedIn URLs for Research:
- LinkedIn Sales Navigator - Advanced search
- LinkedIn Company Pages - Employee lists

---

2. Company Websites

Key Pages to Check:

Page	What to Find
Leadership/About Us	Executive team, Medical Affairs heads
Careers/Jobs	Hiring needs indicate growth, team structure
Press Releases	New hires, product launches, partnerships
Pipeline	Development stage products (future needs)
Contact	Medical information departments

Example Company Research URLs:

France:
- Sanofi Careers

- Servier Careers
- Ipsen Careers
- bioMérieux Careers

Belgium:
- UCB Careers
- Janssen (J&J) Belgium
- GSK Belgium

UK:
- AstraZeneca Careers
- GSK Careers
- Novo Nordisk UK

---

3. Industry Conferences & Events

Key Medical Affairs Conferences:

Conference	Focus	Where to Find Attendees
DIA Annual Meeting	Regulatory, Medical Affairs	DIA Global
MAPS (Medical Affairs Professional Society)	Medical Affairs	MAPS
ISMPP Annual Meeting	Medical Publications	ISMPP
TOPRA Annual Symposium	Regulatory Affairs	TOPRA
EuroMeeting (DIA)	European Regulatory	DIA Europe

Therapeutic Area Conferences:
- **ESMO** (Oncology): esmo.org
- **EASL** (Liver): easl.eu
- **ESC** (Cardiology): escardio.org
- **ECCMID** (Infectious Disease): eccmid.org
- **AAN** (Neurology): aan.com

How to Use:
1. Check speaker/faculty lists on conference websites
2. Review abstract books for author affiliations
3. Look at sponsor/exhibitor lists for target companies
4. Search LinkedIn for conference hashtags (#ESMO2025, #DIA2025)

---

4. Professional Associations

Medical Affairs Associations:
- MAPS - Medical Affairs Professional Society - Global membership directory
- MSL Society - MSL-specific networking
- AMCP - Academy of Managed Care Pharmacy - HEOR/Market Access

Regulatory Associations:
- RAPS - Regulatory Affairs Professionals Society
- TOPRA - The Organisation for Professionals in Regulatory Affairs
- DIA - Drug Information Association

Medical Writing:
- ISMPP - International Society for Medical Publication Professionals
- EMWA - European Medical Writers Association
- AMWA - American Medical Writers Association

---

5. Clinical Trials Databases

ClinicalTrials.gov (clinicaltrials.gov)
- Search by company sponsor
- Find medical monitors and study contacts
- Identify companies active in specific therapeutic areas

EU Clinical Trials Register (clinicaltrialsregister.eu)
- European trial database
- Sponsor and contact information

How to Use:
1. Search sponsor name to see trial portfolio
2. Identify therapeutic focus areas
3. Look for trials recruiting (active medical affairs needs)
4. Note locations for regional expansion

---

6. Publication Databases

PubMed (pubmed.ncbi.nlm.nih.gov)
- Search company names in author affiliations
- Identify prolific authors (medical writers, MSLs)
- Track publication activity by therapeutic area

Google Scholar (scholar.google.com)
- Author profiles with publication history
- Citation metrics indicate influence

7. News & Press Releases

Pharma News Sources:
- FiercePharma - Industry news
- BioPharma Dive - Biotech focus
- Endpoints News - Clinical development
- Scrip (Informa) - Global pharma
- Le Quotidien du Médecin - French market

Press Release Wires:
- Business Wire - Company announcements
- PR Newswire - Press releases
- Company investor relations pages

Qualification Criteria

Scoring Matrix

Criterion	High (3 pts)	Medium (2 pts)	Low (1 pt)
Role Level	VP/Head/Director	Manager/Lead	Specialist/ Coordinator
Budget Authority	Direct budget owner	Influences budget	No budget authority
Company Stage	Launch/Growth phase	Mature portfolio	Declining/ restructuring
Therapeutic Fit	Immunology, Virology, Oncology	Adjacent areas	Unrelated
Recent Activity	New product launch, FDA approval	Pipeline advancement	Stable operations
Geographic Fit	France, Lyon area	Francophone Europe	Other

Priority Tiers:
- **Tier 1** (15-18 pts): Immediate outreach
- **Tier 2** (11-14 pts): Priority follow-up
- **Tier 3** (7-10 pts): Nurture campaign
- **Tier 4** (<7 pts): Low priority

Red Flags (Disqualify)

- Company in major restructuring/layoffs
- Role focused on commercial/sales (not medical)
- No products in development or approved
- Company has large in-house medical writing team

Country-Specific Research

Belgium

Key Pharma Hubs:
- **Brussels**: UCB HQ, Janssen Pharmaceutica, GSK Vaccines
- **Ghent**: Biotech cluster (Ablynx/Sanofi, argenx)
- **Leuven**: KU Leuven spin-offs, Galapagos

Target Companies:

Company	HQ	Focus	Medical Affairs Research
UCB	Brussels	Neurology, Immunology	ucb.com/careers
Janssen (J&J)	Beerse	Oncology, Immunology, Vaccines	janssen.com
GSK Vaccines	Wavre	Vaccines	gsk.com
Galapagos	Mechelen	Inflammation, Fibrosis	glpg.com
argenx	Ghent	Immunology	argenx.com

LinkedIn Search:

```
"Medical Affairs" AND Belgium
"MSL" AND (UCB OR Janssen OR GSK) AND Belgium
"Affaires Médicales" AND Belgique
```

Belgian Pharma Associations:
- pharma.be - Belgian pharmaceutical industry association
- bio.be - Belgian biotech association

United Kingdom

Key Pharma Hubs:
- **London**: Global HQs, specialty pharma
- **Cambridge**: Biotech cluster (AstraZeneca, Abcam)
- **Oxford**: Vaccine development (Oxford/AZ vaccine)
- **Manchester/Northwest**: Pharma manufacturing

Target Companies:

Company	UK Location	Focus	Medical Affairs Research
AstraZeneca	Cambridge	Oncology, Respiratory, CV	careers.astrazeneca.com
GSK	Brentford	Vaccines, Respiratory, HIV	gsk.com/careers
Novo Nordisk	Gatwick	Diabetes, Obesity	novonordisk.co.uk
Roche UK	Welwyn	Oncology, Diagnostics	roche.co.uk
Pfizer UK	Tadworth	Multi-therapeutic	pfizer.co.uk
Ipsen UK	Slough	Oncology, Rare Disease	ipsen.com

LinkedIn Search:

```
"Medical Affairs" AND "United Kingdom"
"MSL" AND (AstraZeneca OR GSK OR Roche) AND UK
"Head of Medical" AND pharma AND London
```

UK Pharma Associations:
- ABPI - Association of the British Pharmaceutical Industry
- BIA - BioIndustry Association

Switzerland

Key Pharma Hubs:
- **Basel**: Novartis, Roche global HQs
- **Geneva**: OM Pharma, international organizations
- **Zurich**: Biotech startups

Target Companies:

Company	Location	Focus	Medical Affairs Research
Novartis	Basel	Multi-therapeutic	novartis.com/careers
Roche	Basel	Oncology, Diagnostics	roche.com/careers
OM Pharma	Geneva	Immunotherapy	ompharma.com
Ferring	Saint-Prex	Reproductive Health	ferring.com

Netherlands

Key Pharma Hubs:
- **Amsterdam**: European HQs
- **Leiden**: Biotech cluster

Target Companies:
- **Galapagos** (Amsterdam office)
- **Janssen** (Leiden)
- **Organon** (Oss)
- **Kite Pharma/Gilead** (Amsterdam)

Research Workflow

Step 1: Company Identification

1. Start with industry news for recent launches/approvals
2. Check ClinicalTrials.gov for active sponsors
3. Review conference exhibitor lists

Step 2: Contact Discovery

1. Search LinkedIn for company + role keywords
2. Check company website leadership pages
3. Review press releases for named individuals
4. Search publication databases for authors

Step 3: Enrichment

1. Read LinkedIn profiles thoroughly

2. Check for recent posts/activity
3. Look for mutual connections
4. Review company news for context

Step 4: Qualification

1. Score against qualification matrix
2. Identify specific pain points
3. Note recent triggers (launch, approval, hiring)
4. Prioritize by tier

Step 5: Outreach Preparation

1. Customize message template
2. Reference specific company news/challenges
3. Prepare value proposition alignment
4. Set follow-up cadence

Tracking & CRM

Recommended Fields to Track

Field	Purpose
Name	Contact identification
Title	Role understanding
Company	Account grouping
LinkedIn URL	Profile access
Email	Direct outreach
Country	Regional segmentation
Therapeutic Area	Service alignment
Priority Score	Outreach sequencing
Last Contact Date	Follow-up timing
Pain Points	Message personalization
Source	Channel attribution
Status	Pipeline stage

Suggested Tools

- **LinkedIn Sales Navigator** - Advanced search and lead tracking
- **HubSpot CRM** (Free tier) - Contact management
- **Notion/Airtable** - Flexible database
- **Google Sheets** - Simple tracking

Key Takeaways

1. **Focus on Medical Affairs, Scientific Affairs, Regulatory Affairs** - These are SciSense's core buyers
2. **Prioritize decision makers** (VP/Head level) but nurture influencers (MSLs, Project Managers)

3. **Use company news as conversation starters** - Product launches, FDA approvals, partnerships
4. **LinkedIn is the primary research tool** - Combine with company websites and conference data
5. **Qualify rigorously** - Focus effort on high-potential prospects
6. **Personalize based on research** - Reference specific challenges and news
7. **Track everything** - Build institutional knowledge for long-term relationship development
